FOR GRADES BV TO XII
INSTALLATION OF AIR PURIFIERS

Dear Parents,

The health, safety and well-being of our students remain our foremost priority. As we prepare for the winter months, when air quality in Delhi may deteriorate significantly, the school is taking proactive measures to strengthen the indoor environment and ensure that our students continue to learn in a cleaner, healthier and safer setting.

Keeping in view the concerns and requests received from parents, the School has initiated the installation of **air purifiers across all indoor spaces of the school.**

Air Purifier Committee

To ensure that the decision was based on careful assessment and expert consideration, an **Air Purifier Committee comprising representatives from the parent community and teaching staff** was constituted. The Committee reviewed various air purifier models, taking into consideration their performance, filtration efficiency, suitability for school spaces and other relevant parameters. Following this review, **two suitable air purifier models have been shortlisted and installed in the school on an observation basis.** Their performance and effectiveness are currently being monitored.

GRAP Guidelines and Continuity of Classes

Parents may kindly note that, as per the prevailing Government guidelines applicable during the implementation of **GRAP Stages I, II and III**, schools may continue to conduct physical classes in accordance with the directions issued by the Government of NCT of Delhi, including provisions relating to hybrid learning, wherever applicable.

The installation of air purifiers is intended to further strengthen the school's preparedness during such periods and enable the school to provide a **cleaner, healthier and safer indoor environment**, thereby supporting the smooth and uninterrupted conduct of classes, subject to the directions issued by the Government from time to time.

However, in the event of **GRAP Stage IV**, if the Government does not permit students to attend school physically and hybrid classes are also not permitted, students will remain at home. In such a situation, the school will **strictly comply with all guidelines, orders and directions issued by the Government of NCT of Delhi.**

One-Time Contribution for Air Purifiers

To facilitate the installation of air purifiers in **all indoor spaces of the school**, a **one-time contribution of ₹2,000 per student** will be collected along with the **October 2026 fee**.

Parents are requested to note the following:

- The amount of **₹2,000 is a one-time charge only**.
- The contribution will be collected **only once and will cover a period of three years**.
- The charge will apply to students from **Balvatika to Grade XI**.
- **No recurring monthly/ annual charge** will be levied towards the installation of the air purifiers during this three-year period.
- All additional expenses related to **maintenance, replacement of filters, operational costs and other associated requirements** during this period will be borne by the school.

The school believes that **preparedness is the key to ensuring continuity and safety during challenging environmental conditions**. The installation of air purifiers is therefore being undertaken as a preventive and long-term measure, keeping the well-being of our students at the centre of our planning.

We value the trust placed in us by our parents and remain committed to working collaboratively with the entire school community to provide our students with a **safe, healthy and conducive environment for learning**.

Regards,

Ruchika Sukhija
Principal
