

# Report On Online Summer Camp 1 and 2

MSMS Computer Department organised an Online Summer Camp for classes IV to VIII students to introduce and build new digital skills that are in high demand in today's era of digital world . Around 50 students participated and learned about various software and apps.

The software and apps are Photoscape, Windows Movie Maker, Macromedia Flash MX 2004, Adobe Premiere Pro, Flipa Flip and Canva. Using these applications, students learnt the fundamentals of Introduction to block based coding using Scratch 2.0 Online and Offline Editor. It is to develop Creativity and Analytical Skills in children that enhances their thinking capabilities also.

As Students came to learn skills, they learnt and practiced every action with practical implementations during online sessions under the guidance of computer faculty. Students learnt to create graphics, collages, videos, effects and animations. They are also capable of creating interactive stories, comics, games using coding in

Scratch 2.0. It is learning with fun concept that is provided to students to do something new during this Summer Vacation.

The students' and computer department's active participation filled a great zeal of enthusiasm to continue the learning activities that truly educate the students with fun and impactful skills to stand alone in the modern era.
