COMPETENCY BASED QUESTIONS
(CASE BASED QUESTIONS)

I. Read the given paragraph and answer the questions that follow.

Drinking water directly from a natural source is not safe. There is a need to purify water before drinking. Unpurified water may contain germs that cause water-borne diseases such as cholera, dysentery, diarrhoea and typhoid. Purifying water removes harmful germs and makes it safe for consumption. Water that is safe for drinking is called potable water. Potable water is colourless, odorless and tasteless.

Q1 Why is there a need to purify water before drinking?

Q2 What is potable water?

Q3 Name any 2 water borne diseases.

Q4 Write any 2 ways to reduce water pollution.

II. Animals have different types of body coverings. Some animals have hair, some have scales and some have feathers on their bodies. Animals like deer and zebra have hair on their bodies and give birth to young ones, they are called mammals. Animals such as snakes, crocodiles and lizards have scales on their bodies. Some animals like the porcupine have sharp spikes on their bodies. These spikes help protect them from enemies.

Q1 Define the term Camouflage?

Q2 Name any two animals that have scales on their bodies.

Q3 How do spikes help animals like porcupines?

Q4 Who are mammals?

III. Houses in urban areas are stronger and more durable than the houses in rural areas. They are made up of baked bricks, iron, cement, wood, concrete and asbestos. The floors are made up of materials like tiles and marbles and walls are made up of bricks plastered with mixture of cement and sand they are called pukka houses. Pukka houses have many rooms like drawing room, dining room, kitchen bathroom and bedrooms.

Q1 What are pukka houses?

Q2 Why are houses in urban areas more durable than houses in rural areas?

Q3 Why are tall apartments commonly seen in towns and cities?

Q4 Choose the odd one out and give reason for your choice.
